

WashTrack

Laundry management system

Ritika 2420821

Shivangi 2420848

Project Overview

Built for Simplicity and Reliability

The Challenge

Traditional laundry services rely on manual tracking, paper logs, and phone-based updates — leading to lost orders, miscommunication, and frustrated customers.

Our system replaces this chaos with a centralized, web-based platform that brings transparency and efficiency to every step of the process.

Key Objectives

- Enable customers to place and track orders online
- Give admins a unified dashboard to manage workflows
- Ensure data security through authentication and hashing
- Deliver a clean, intuitive interface for all users

Core Capabilities

Features That Drive the Experience

Registration & Login

Customers can create accounts and securely log in to manage their laundry orders.

Place Orders

Select services, submit orders, and get instant confirmation — all from the browser.

Order Tracking

Monitor order status in real time, from pickup to wash, dry, fold, and delivery.

Order History

View past orders with timestamps and service details for easy reference.

Admin Dashboard

Administrators manage all orders, update statuses, and oversee operations centrally.

Secure Authentication

Passwords are hashed and sessions are protected for both customer and admin roles.

Technology Stack

Built on a Proven Web Foundation

Layer	Technology	Role
Backend	Python + Flask	Routing & logic
Database	SQLite	Data storage
Templating	HTML	Page rendering
Frontend	CSS + JavaScript	Styling & interaction

System Workflow

From Customer to Completion

Each step flows seamlessly into the next, ensuring a smooth experience from the moment a customer registers to the moment their laundry is ready for pickup.

Advantages & Future Scope

Delivering Value, Planning Ahead

Advantages

- Easy order management
- Faster processing
- Secure and reliable
- User-friendly interface
- Accurate real-time tracking

Future Scope

- Email & SMS notifications
- Multi-service management
- PostgreSQL migration
- Mobile app support

Thank You
